

6' Deluxe Bench

ASSEMBLY INSTRUCTIONS

Parts Included:

3 – Bench Legs

2 – Bench Lengths

(Seats and Back pieces are interchangeable)

Hardware Included:

24 – 4" Coated Steel Screws

Tools Needed:

Power Drill with Square Bit

or Screwdriver with Square Tip

 **Build the bench on a flat or level surface.**

Step 1 - Stand up the three bench legs and place the seat length on top of the horizontal (seat) edge of the legs. Make sure the legs are between the 2" x 2" runners on the bottom of the seat. See photo above.

Step 2 - Check that the seat length is resting flat against the horizontal (seat) edge of the leg and snug against the back stop of the leg. See photo above.

Step 3 - Screw 4 – 4" coated steel screws into each leg using the pre-drilled holes through the 2" x 2" runners. See the photo above.

Step 4 - Place the back length against the vertical (back) edge of the legs and make sure the back rests snug against the leg and the bottom stop of the leg. See photo from Step 2.

Step 5 - Screw 4 – 4" Coated Steel Screws into each leg using the pre-drilled holes through the 2" x 2" runners. See photo above.

Your bench is complete. Enjoy!
