

# 6' Standard Bench

## ASSEMBLY INSTRUCTIONS

### Parts Included:

- 3 – Bench Legs
- 1 – Bench Seat Length (contains 2 – 8" wide boards)
- 1 – Bench Back Length (contains 1 – 10" wide board)

### Hardware Included:

- 24 – 4" Coated Steel Screws

### Tools Needed:

- Power Drill with Square Bit
- or Screwdriver with Square Tip

**!** Build the bench on a flat or level surface.

Step 1 - Stand up the three bench legs and place the seat length on top of the horizontal (seat) edge of the legs. Make sure the legs are between the 2" x 2" runners on the bottom of the seat. See photo above.

Step 2 - Check that the seat length is resting flat against the horizontal (seat) edge of the leg and snug against the back stop of the leg. See photo.

Step 3 - Screw 4 – 4" coated steel screws into each leg using the pre-drilled holes through the 2" x 2" runners. See the photo below.

Step 4 - Place the back length against the vertical (back) edge of the legs using the wood spacers provided. Make sure the back rests snug against the leg. See photo.

Step 5 - Screw 4 – 4" Coated Steel Screws into each leg using the pre-drilled holes through the 2" x 2" runners. See photo above.

Your bench is complete. Enjoy!
